Hispanics: College Majors and Earnings

Majors fall into two categories:

1. Grouped majors are the family of specific majors.
2. Detailed majors, reflect a specialization of study.

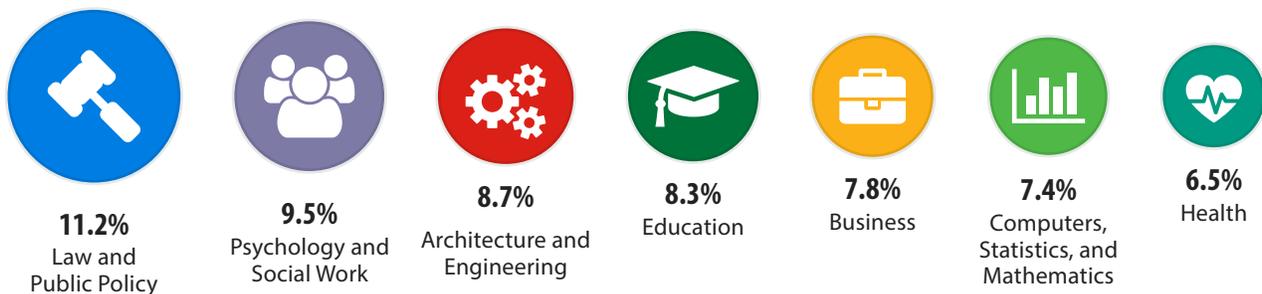

For example, Nutrition Sciences, Pharmaceutical Sciences, and Nursing, these are all specific majors under the larger grouping of Health majors.

Prevalence of Hispanic degree holders

In an analysis of the 137 majors measured, Hispanics received *at least 4 percent* of the Bachelor's degrees granted in 86 of the 137 majors, and *fewer than 4 percent* of the degrees granted in the remaining 51 areas. Hispanics represent at least 10 percent of Bachelor's degree recipients in only 17 majors, and are most represented in **International Business**, where they hold 22 percent of degrees.

Concentrations of Hispanic Bachelor's degree holders among major groupings:

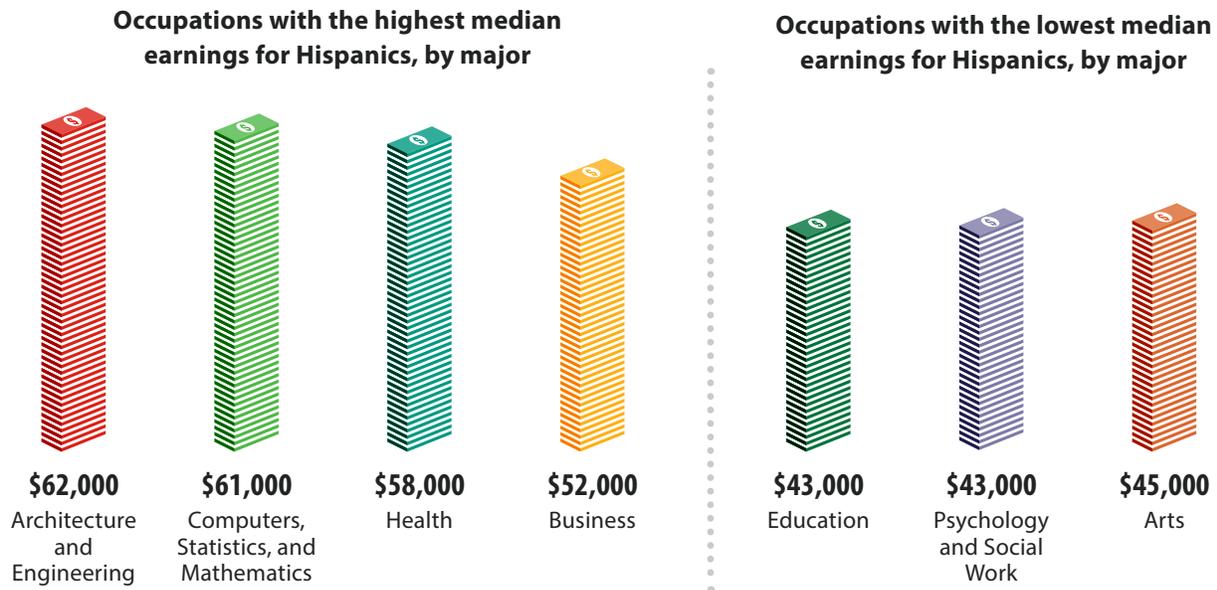

Bachelor's degree holders refers to adults between the ages of 21 and 59 with a Bachelor's degree but no graduate degree. Earnings data are reported for workers employed full-time, full-year.

Source: Georgetown University Center on Education and the Workforce analysis of U.S. Census Bureau, American Community Survey micro data, 2009-2013.

Hispanic Earnings by Major

Majors play a large part in earnings, with salaries in STEM fields often **60 percent** more than the median earnings in Education and Liberal Arts and Humanities.

When measured more specifically, Hispanics who majored in Pharmacy and Pharmaceutical Sciences and Administration have the highest median earnings at \$90,000. Chemical, Electrical, Mechanical, Civil and Computer Engineering follow with median earnings ranging from \$65,000 to \$75,000. Hispanic graduates in Information Sciences earn \$67,000. The lowest paying major for Hispanics is Early Childhood Education, with a median salary of \$35,000. Surprisingly, one major near the bottom is in engineering; Hispanics who majored in biomedical engineering earn a median of \$43,000 per year because a large portion end up working in lower paying occupations.

Hispanics in the Nation's Fastest Growing Occupational Fields:

Over the next 10 years 55 million new jobs will be created in the United States. Of those newly created jobs, 65 percent will require education beyond high school. The fastest-growing fields in the U.S are: Healthcare, STEM (Science, Technology, Engineering, and Mathematics), Consulting, Marketing, and Finance.

Even though Hispanics represent 17 percent of the total population, they have low concentrations of degree holders in the those growing fields. For instance in the Healthcare field (or major grouping), 6.5 percent are Hispanic. In STEM, Hispanics are represented as follows: General Engineering (11%), Computer and Information Systems (9%), and Mathematics (6%). In the Business field Hispanics are represented at 7 percent percent in Finance and 6 percent in Marketing.

While no major lines up perfectly with the mentioned growing occupations, Hispanics choosing majors in those fields will be better positioned to successfully obtain higher paying jobs.

ACKNOWLEDGEMENTS

We would like to express our gratitude to the individuals and organizations whose generous support has made this report possible: **Lumina Foundation** (Jamie Merisotis and Holly Zanville), **The Bill & Melinda Gates Foundation** (Daniel Greenstein and Jennifer Engle) and **The Joyce Foundation** (Matthew Muench and Whitney Smith). We are honored to be partners in their mission of promoting postsecondary access and completion for all Americans.

Many have contributed their thoughts and feedback throughout the production of this publication. We are grateful for our talented designers, Tim Duffy and Josias Castoreña and meticulous editorial advisor Marty Van Der Werf whose tireless efforts were vital to our success. In addition, the dedication of Georgetown CEW's economists, analysts, writers, communications team and operations staff was instrumental to production of this report, from conceptualization to completion.

- A special thanks to Ricardo Real Preciado, Hispanic Initiative Associate, for his commitment and dedication to this project and our efforts in reaching the Hispanic community.
- Ban Cheah - data analysis
- Jeff Strohl - research direction
- Ricardo Real Preciado – translation
- Hilary Strahota, Ana Castanon, Vikki Hartt, Monet Clark – communications efforts
- Joe Leonard, Coral Castro – logistics and operations

The views expressed in this publication are those of the authors and do not necessarily represent those of Lumina Foundation, the Bill & Melinda Gates Foundation, the Joyce Foundation, or their officers or employees.
